PROFILE

2022 Graduate of the MFA degree in metal and jewellery at Kunsthogskolen I Oslo. I have a wide range of materials I admire to work in such as metal, wood, plaster and plastic. My work encompasses a variety of mediums depending on the concept and theme however one aspect that I truly admire is being able to implement my art works on the body. No matter what material is being used, as an artist I challenge myself to incorporate the body. In addition, I aim to incorporate recycling materials into my artworks to give them a new life.
